

BG214 DUAL GRINDER

More Power. More Throughput. More Control.

The BG214 gives your shop the muscle to move metal faster. With two independent 3" x 132" belt stations, operators get unmatched grinding flexibility, nonstop productivity, and industrial-grade durability built to survive real production floors.

Why Shops Choose the BG214

- Dual 14" x 3" 70-duro serrated stations double workflow.
- 15 HP 3PH motor cuts through steel and castings fast.
- 3" x 132" belt provides stable performance and long life.
- Rigid construction stays accurate under heavy daily use.
- Operator-friendly layout boosts control, consistency, and safety.
- Built for pros who demand power.
- **Made in USA**

Built for Industrial Throughput

- Perfect for:
- Steel fabrication shops
- Foundries & casting cleanup
- Production lines
- Heavy maintenance departments
- If your team grinds all day, this is the machine built to keep up.

Upgrade Your Grinding Workflow Today

Stop losing time to slow, underpowered grinders.

The BG214 delivers the performance your team will feel on day one.
