

## Why the BG214 Dominates Heavy Grinding

The BG214 dual grinder gives your shop more power, more speed, and more control. With two 3" x 132" belt stations and industrial-grade durability, it's built to take on the toughest grinding jobs all day long.

### See What Makes the BG214 Stand Out

- Two grinding heads → double the workflow, same footprint
- 3" x 132" belts → cooler grinding and longer belt life
- Built for steel manufacturers, metal foundries, and casting cleanup
- Heavy-duty construction for continuous, all-shift work
- Stable belt tracking that reduces downtime and operator fatigue
- The BG214 is engineered to handle what other grinders can't.

### Is the BG214 the Right Fit for Your Shop?

- You'll benefit immediately if you:
- Grind large castings or tough steels
- Need two operators working at once
- Want longer belt life and cooler-running belts
- Require industrial-duty performance every shift
- Need a grinder that can stand up to foundry-level workloads

### Why Choose Kalamazoo Industries

- Proudly built in the USA
- Fast parts availability
- Decades of experience designing industrial belt grinders
- Trusted by foundries, steel manufacturers, and metal shops nationwide
- Made for people who need machines that simply don't quit.

Stop fighting slow grinding processes. Upgrade to the BG214 now—your team will feel the difference on day one. **Scan the QR Code** to learn more and to request your quote today.
