

From Prototype to Production – The BG272 Advantage

When precision, speed, and reliability matter, the Kalamazoo BG272 2 x 72 Inch Industrial Belt Grinder delivers. Built for the demands of metal fabrication companies, custom fabrication shops, and sheet metal fabrication services, this table top grinder turns rough stock into smooth, ready-to-fit parts — fast.

Whether you're shaping prototypes or finishing production runs, the BG272 keeps your workflow moving. Its solid steel construction, powerful motor, and easy belt change system make it a must-have for any shop focused on metal forming and high-quality results.

Key Benefits

- Precision Performance: Delivers consistent, flat finishes on a wide range of metals.
- Built to Last: Rugged all-steel design stands up to daily shop use.
- Quick Belt Change: Switch belts in seconds — no downtime.
- Compact Table Top Design: Saves space while maximizing grinding power.
- Perfect for Custom Work: Ideal for part finishing, edge shaping, and fabrication prep.
- Made in USA

Put the BG272 to Work in Your Shop

From prototype grinding to production-ready finishing, the BG272 is the tool your team can count on every day.

Level up your grind and keep your projects moving — faster, cleaner, and with less effort.
