

BG272 – 2" x 72" **Industrial High Speed Grinder**

The Kalamazoo BG272 is a powerful, American-made high speed grinder built for heavy metal removal, precision shaping, and finishing. With a 3 HP motor and 7,200 SFPM belt speed, it delivers the performance fabrication shops, forging facilities, and metal supply operations rely on daily. Its multi-position head and fast belt changes help minimize downtime while maximizing workflow efficiency.

Why Choose the BG272 for Your Shop?

- Built for continuous industrial use
- Fast belt changes reduce downtime
- Multi-position head adapts to any job
- High torque for aggressive grinding
- Precise tracking for consistent results
- **American-built reliability and long service life**
- Ideal for shaping, deburring, beveling, and finishing steel stainless, and aluminum.

Who Can Use This Equipment?

- Fabrication shops
- Metal supply centers
- Blacksmithing and forging companies
- Tooling and machine shops
- Welding and metal repair businesses
- Railings and gate manufacturers
- Custom metalworking shops
