Maintenance Checklist for Kalamazoo DS10V 10-Inch Disc Sander with Vacuum

Daily Maintenance

- Inspect the sanding disc for wear; replace if needed to ensure optimal performance.
- Check the vacuum filter for dust build-up. Clean it if necessary to maintain efficient dust collection.
- Inspect and clean the worktable to remove any dust or debris, ensuring a stable surface.

Weekly Maintenance

- Clean the interior of the vacuum base by accessing the door and removing accumulated dust.
- Check the vacuum system toggle switch to ensure its functioning properly.
- Inspect the disc sander motor for any unusual noise or overheating and clear any dust around it.

Monthly Maintenance

- Replace the vacuum filter if there's a significant build-up, especially when sanding metal to avoid fire hazards.
- Tighten any loose screws or fasteners on the machine, particularly around the work table and disc.
- Inspect and replace any worn parts, including the sanding disc, toggle switch, and vacuum system components.

Following these maintenance steps regularly will help extend the lifespan and performance of your Kalamazoo DS10V Disc Sander with Vacuum.
