

# DS10

## Electric Disc Sander

10" Industrial Disc Sander for Metal, Wood & Composite Finishing

½ HP Motor | 3,450 RPM | PSA Disc System | 115V/230V | Made in USA

*Precision Sanding. American Made. Built to Last.*

# Built for Industrial Performance

The Kalamazoo DS10 is a heavy-duty bench disc sander engineered for industrial shops that demand reliable, repeatable results every shift.

Powered by a direct-drive ½ HP motor at 3,450 RPM, the DS10 handles deburring, beveling, squaring ends, and edge finishing on metal, wood, and composites.

Heavy-duty all-steel construction provides the rigidity and vibration damping that industrial production demands — shift after shift, year after year.

**Precision Sanding. American Made. Built to Last.**

WORKTABLE

**6" × 11"**

TILT RANGE

**90° to 45°**

Electrical: 115V/230V Switchable | Drive: Direct Drive | Construction: All-Steel | Weight: 50 lbs | Made in USA

# Features Built for the Shop Floor

## Direct-Drive ½ HP Motor

3,450 RPM delivers steady power without belts or pulleys that wear out.

## Steel Disc Guard

Keeps operators protected during heavy use on the shop floor.

## 115V/230V Switchable

Plugs into standard shop power with no rewiring required.

## PSA Disc System

Swap grits fast — from stock removal to fine finishing with zero downtime.

## All Parts Replaceable

Every part is stocked and available — keeps your machine running for years.

## Made in the USA

Built in Kalamazoo, MI. Backed by a 1-year parts warranty.

# Why Shops Choose the DS10

## Industrial Durability

All-steel construction absorbs vibration and handles daily abuse — engineered for production, not hobby use.

## Zero Belt Complexity

Direct drive eliminates belt wear, tension adjustments, and the downtime that comes with them.

## Versatile Angles

Adjustable tilt table locks 45° down to 15° up for precise, repeatable bevel and angle work.

## American Quality

Made in Michigan since 1960. Real warranty, real support, and parts always in stock.

**NO**

Belt Wear Issues

**Yes**

Rewiring Needed

**NO**

Complex Maintenance

**100%**

Made in USA

# Ideal Applications

## Metal Fabrication

Deburr edges, bevel cuts, and square bar stock ends after sawing. Essential for weld prep and part cleanup.

## Production Shop Prep

True outside curves, remove mill scale, and finish workpieces before machining or welding.

## Woodworking & Composites

Smooth end grain, true outside curves on wood and composite panels with precision angle control.

## General Industrial Use

Versatile enough for plastics, rubber, and soft metals — wherever consistent sanding is needed.

Accessories: 12-P Steel Stand | MG-10 Mitre Gauge | PSA Discs: 50, 80 & 100 Grit Available
