

Kalamazoo K12-14 14 Inch Wet Metal Cutting Saw: Frequently Asked Questions

Q: What types of metal can the K12-14 cut?

A: The K12-14 is designed for cutting ferrous metals, including mild steel, hardened steel and stainless steel (with the appropriate blade).

Q: What are the benefits of wet cutting?

A: Wet cutting offers several advantages over dry cutting:

- **Reduced Heat:** The coolant system keeps the workpiece and blade cool, preventing warping and extending blade life.
- **Cleaner Cuts:** The coolant washes away metal chips, resulting in smoother cuts.
- **Minimized Dust:** Significantly less airborne dust, creating a safer and cleaner work environment.

Q: What is the saw's cutting capacity?

A: The K12-14 has the following cutting capacities:

- Round Solids: Up to 2.5 inches
- Shapes: Up to 3 inches

Q: Does the saw come with a blade?

A: No, blades are sold separately. Kalamazoo Industries offers a wide selection of abrasive blades specifically designed for metal cutting. Choosing the right blade depends on the type of metal you'll primarily be cutting.

Q: What safety features does the K12-14 have?

A: The K12-14 prioritizes safety with:

- Steel-hinged wheel guard
- Adjustable backstop
- Magnetic switch and rotary switch
- 24-volt controls

Kalamazoo K12-14 14 Inch Wet Metal Cutting Saw: Frequently Asked Questions
