

K20E Enclosed Cut-Off System

Upgrade your cut station with a safer, cleaner way to process stock - built for the pace and realities of busy shops.

Why shop owners upgrade

- Reduce operator exposure with an enclosed cutting area and full viewing window.
- Contain chips/sparks and help keep the floor cleaner around the cut station.
- Improve consistency with rigid workholding and simple, repeatable controls.
- Cut rework and scrap by dialing in a process your team can repeat shift after shift.
- Rugged, shop-ready construction designed for day-in, day-out use.

Great fit for

Job shops, fabrication & weld shops, maintenance departments, and production cells that need reliable throughput without sacrificing safety.

Tip: Bring your cut list and throughput goal. We'll recommend a configuration that fits your space, team, and budget.

SAFER • CLEANER • CONSISTENT
