

KM14HS 14" High-Speed Non-Ferrous Mitre Saw

Fast, clean, repeatable cutting for aluminum, brass, plastics, and PVC.

Built for shops cutting non-ferrous materials, the KM14HS delivers smooth, burr-free results with manual simplicity and industrial durability. It is well suited for aluminum suppliers, extrusion work, PVC trim, and growing machining operations.

Why shops choose the KM14HS

- True high-speed cutting for smooth finishes
- Dual cam vises for secure, repeatable holding
- Cast iron construction helps reduce vibration
- Mitre capability up to 45° left and right

Motor	5 HP 1PH 230V and or 3PH 230V and 460V (specify)
Spindle speed	4400 RPM
Arbor	1"
Cutting capacity	2.5" solid at 90° • 3" pipe at 90° • 2.25" at 45°
Vise opening	Up to 6"
Mitre range	45° left and right with positive index holes
Drive system	Dual V-belt drive with sealed ball bearings
Machine size / ship wt.	48" L × 45" W × 63" H • 500 lbs.
Country of origin	Made in USA
