**KM20-22V Mitre Saw with
Industrial Extractor**

Precision Cutting Meets
Clean Performance

Product Overview

The KM20-22V is a heavy-duty 20-inch abrasive mitre saw engineered for high-performance metal cutting. Equipped with an integrated industrial extractor and mitre saw dust hood, it delivers clean, accurate cuts while maintaining a safer, debris-free workspace. Ideal for fabrication shops and industrial environments.

Key Features

15 HP, 3-phase motor (220V or 440V)

Optional 20 HP motor available

Built-in 1200 CFM dust collector with hood and bag

Dual air-operated chain vises

1" spindle with sealed ball bearings

Mitres left and right up to 45°

Magnetic starter for reliable operation

Made in the USA

Technical Specifications

Wheel Diameter: 20"

Cut Capacity @ 90°: 4" solids, 6" shapes

Cut Capacity @ 45°: \approx 2.83" solid mild steel, \approx 4.24 " most shapes

Shipping Weight: Approx. 1,700 lbs

Shipping Dimensions: 78" L x 76" W x 77" H

Applications

Fabrication shops

Industrial metalworking

High-volume production lines

Projects requiring an abrasive metal
cutoff saw blade

Ideal shop equipment for sale
listings

Benefits

Cleaner cuts with integrated dust collection

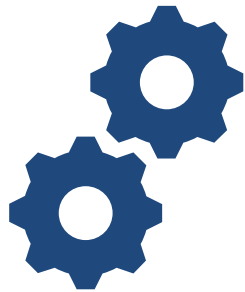

Reduced cleanup time and improved air quality

Heavy-duty performance for demanding applications

Increased productivity and operator safety

Built to last with industrial-grade components
