

KS390 3" x 90" Industrial Abrasive Belt

Powerful. Reliable. Built for Heavy Metal Finishing.

The Kalamazoo KS390 is a high-speed, industrial belt grinder engineered for production floors, fabrication shops, and metal foundries that demand strength and dependability. This machine delivers fast material removal and smooth, consistent results across iron and metal, various steel grades, and industrial castings—making it a vital tool for anyone finishing metal daily.

Key Benefits:

- Motor: 2HP 1PH 220V and or 3HP 3PH 220V or 440V
- High-speed 3" x 90" belt for aggressive grinding and fine finishing
- Ideal for production environments and industrial casting cleanup
- Built for long duty cycles and heavy grinding applications
- Smooth, balanced performance for precision metal finishing
- Durable American-made construction for decades of use
- **Made in USA**

Perfect For:

- Fabrication shops
- Metal foundries
- Steel processing operations
- Advanced manufacturing facilities
