

Is your production
grinding to a halt?

Solve slow production & breakdowns with the KS390HV-5

Production Challenges

Slow Production

Throughput lags schedule when your grinder can't keep up.

Equipment Breakdown

Frequent mechanical failures cause unplanned downtime and lost profits.

Meet the KS390HV-5

High surface speed

6900 SFPM for rapid material removal with minimal heat.

Powerful motor

5 HP, 3-phase motor (220/440V) for relentless performance.

Generous belt

3" x 90" abrasive belt and 24½" reversible platen.

Built-in dust collector

DCV-6 vacuum base moves 400 CFM to keep your shop clean.

Adjustable table

Cast-iron table tilts 0–45° and allows quick belt changes.

Durable design

8" dia. 70 duro contact wheel, direct drive, spring belt tension.

Features & Benefits

Fast Metal Removal

High surface speed and powerful motor remove material quickly without heat build-up.

Cleaner Workspaces

Built-in dust collector moves 400 CFM, keeping dirt down and reducing cleanup time.

Built to Last

Steel frame, serrated contact wheel and spring belt tension deliver long-term reliability.

User Friendly

Adjustable table tilts up to 45° with quick belt changes and replaceable platens.

Versatility & Applications

Tasks

- Deburring
- Beveling & Contouring
- Grinding & Descaling
- Polishing & Finishing
- Tool sharpening & Prep

Industries

- Energy / Utilities
- Oil & Natural Gas
- Petrochemical
- Knife Manufacturing
- Automotive
- Metal Foundries

Reliability & Quality

Heavy-Duty Construction

Steel frame, direct drive and serrated contact wheel withstand rigorous industrial use.

Integrated Dust Control

Vacuum base minimises dust build-up that can damage components and cause downtime.

Made in USA

Built with quality materials and backed by a 1-year parts warranty for peace of mind.
