

KS390HV-5: A Cleaner, Faster Way to Grind Tough Metals

Are you struggling to grind tough materials while keeping your shop clean and productive?

The Kalamazoo KS390HV-5 is engineered to solve that problem. This powerful grinder with dust collector delivers high-speed performance while pulling dust away at the source, helping your team work safer and more efficiently.

Built for demanding environments like custom steel fabrication, stainless steel fabricators, and shops that regularly process iron and cast iron, the KS390HV-5 offers the muscle and control needed for heavy grinding, shaping, beveling, and finishing. Its 5 HP motor, 3" x 90" belt, serrated contact wheel, and reversible platen make it a reliable workhorse for long shifts and precise results.

Even busy forging companies appreciate its rugged construction and consistent performance. The integrated dust collector keeps debris contained, improving air quality and reducing cleanup time while supporting a safer workspace. With quick belt changes, one-bolt tracking, and all-steel construction, the KS390HV-5 is built to last and designed to reduce downtime.

KS390HV-5 Technical Highlights

- Heavy-duty 3" x 90" belt system powered by a 5 HP motor for fast, aggressive metal removal.
- Integrated dust collector (400 CFM) keeps the workspace cleaner and safer.
- Serrated 8" contact wheel and reversible platen for shaping, beveling, and precision grinding.
- Built for industrial use—ideal for steel, stainless, iron and cast iron applications.
- Reliable American-made construction designed for long service life in demanding shops.
