

KS390HV: The Heavy-Duty Grinding Solution Built for Modern Metal Shops

Is your shop struggling to keep up with tough grinding jobs while staying clean and efficient? The KS390HV is built to solve those challenges with power, precision, and dependable dust control.

This heavy-duty grinder with dust collector is designed for demanding environments like custom steel fabrication, stainless steel fabricators, iron and cast iron work, and high-output forging companies.

Perfect for shaping, deburring, and surface prep, the KS390HV brings safer operation, higher productivity, and cleaner airflow to any metalworking floor.

KS390HV Sales Flyer — Technical Highlights

- High-velocity 3" x 90" belt system delivers fast stock removal and consistent finishing on steel, stainless, and cast metals.
- Integrated industrial dust collector improves visibility, reduces airborne metal dust, and keeps your workspace cleaner.
- 5 HP motor provides stable grinding force for heavy workloads, ideal for fabrication and forging environments.
- Simple belt tracking and contact wheel allow operators to fine-tune performance for precision grinding tasks.
- Rugged steel construction ensures long service life in shops working with iron and cast iron and other tough materials.
