

KS490 Product Spotlight Newsletter

Is your production floor slowed down by grinding bottlenecks?

When metal finishing becomes the rate-limiting step, it impacts throughput, quality, and delivery times. The Kalamazoo KS490 4" x 90" Industrial Abrasive Belt Grinder is built to eliminate those slowdowns and keep demanding operations moving with confidence.

Designed for high-output environments, the KS490 delivers consistent, repeatable results across a wide range of applications—from aggressive stock removal to controlled finishing. Its robust construction and industrial-grade components make it a dependable solution for shops that can't afford downtime.

Why the KS490 Stands Out:

- Production-ready performance for continuous-duty metal processing
- 4" x 90" belt size provides excellent belt life and surface contact
- Heavy-duty frame and drive system built for manufacturing environments
- Versatile grinding capability for deburring, shaping, and surface finishing
- Operator-friendly design that supports accuracy and repeatability
- Made in USA

Whether you're supporting a sheet metal fabrication service, a fabrication cell, or a dedicated finishing station, the KS490 integrates smoothly into your production process. It helps reduce rework, improve consistency, and maintain tight tolerances—shift after shift.

Ready to upgrade your grinding performance?
