

Kalamazoo KS490 Industrial Belt Grinder

The Kalamazoo KS490 4" x 90" Industrial Abrasive Belt Grinder is designed for demanding metalworking environments that require consistent results, durability, and productivity. This heavy-duty grinder delivers reliable performance for grinding, deburring, beveling, and surface finishing in fabrication and manufacturing operations.

Key Benefits

- Industrial-grade construction for daily production use
- High belt speed for fast, consistent material removal
- Versatile grinding positions for multiple applications
- Operator-friendly design that improves workflow efficiency
- Built for long service life in demanding shop environments

Made in the USA | Built for Fabrication | Engineered for High-Output Performance

Specifications

Feature	Specification
Belt Size	4" x 90"
Belt Speed	6900 SFPM
Motor Options	2 HP Single-Phase 230V or 3 HP Three-Phase 230/460V
Platen	24-1/2" long steel, reversible and replaceable
Contact Wheel	8" OD x 4" W serrated, 70 duro, sealed bearings
Belt Tension & Tracking	Spring tension with quick-release and tracking adjustment
Operation Positions	Horizontal through vertical
Construction	Heavy-duty steel frame
Country of Origin	Made in the USA

Applications

- Stock removal and surface grinding
- Deburring and edge finishing
- Beveling and weld preparation
- Sheet metal fabrication
- General production grinding
