Precision Meets Clean Performance: The Kalamazoo S4SWB Wet Belt Sander

Introducing the Kalamazoo Industries S4SWB — a powerful 4" x 36" wet belt sander engineered for fine surface finishing, lapping, and light deburring. Designed with an integrated coolant system and enclosed cabinet base, this machine delivers cleaner results while extending belt life and reducing airborne contaminants.

What Makes the S4SWB Stand Out?

- ✓ 4" x 36" Wet Sanding Belt – Perfect for flat lapping and finishing
- ✓ Internal Coolant System – Reduces friction and heat buildup
- ✓ Enclosed Steel Cabinet Base – Controls mess and enhances safety
- ✓ Steel Workstop – Provides operator control and comfort
- ✓ 1/2 HP 1PH TEFC Motor
- ✓ Built in the USA – Reliable, durable, and built to perform

Clean, Controlled, and Consistent

The S4SWB's wet sanding design prevents heat damage, minimizes dust, and leaves an ultra-smooth finish. It's ideal for tool rooms, metallurgical labs, foundries, and precision manufacturing environments where surface integrity matters.

Applications Include:

- Flat Lapping & Precision Finishing
- Metallurgical Sample Prep
- Tool Sharpening & Deburring
- Composite Finishing
- Light Sanding in Lab Environments
