

Kalamazoo S8HD 8" x 60" Horizontal Belt Sander

Power • Precision • Productivity

Kalamazoo Industries Overview

- Proudly Made in the USA us
- Building industrial equipment since the 1960s
- Trusted across fabrication, metalworking, foundry, and toolroom industries
- Focused on durability, serviceability, and reliability

Product Introduction

The S8HD is engineered for continuous, heavy-duty operation. It is designed for large-scale sanding, deburring, and finishing, perfect for industrial shops with demanding workloads.

Key Features & Specifications

- 7.5 HP Motor (3-Phase, 230V/460V options)
- 8" x 60" Belt Capacity – wide surface for large workpieces
- 3500 SFPM Belt Speed for aggressive material removal
- All-Steel Construction with a heavy-duty stand (900 lbs)
- Pneumatic Belt Tensioning with regulator and gauge
- Precision Belt Tracking with single-knob control
- Reversible 8" x 13" Steel Platen for extended life
- 8" x 12" Cast Iron Worktable
- 24V Magnetic Controls with Jog Feature

Ideal Applications

- Fabrication Shops: weld cleanup, scale removal, edge prep
- Foundries: sprue removal, casting cleanup, flash sanding
- Tool Rooms & Maintenance: resurfacing, deburring, repair work
- General Manufacturing: heavy-duty sanding across industries

Benefits for Shop Owners

- Productivity: Fast stock removal, large belt surface
- Durability: All-steel build, heavy-duty components
- Precision: Cast iron table, belt tracking, platen support
- Safety & Control: Low-voltage controls, pneumatic tensioning
- Serviceability: Easy maintenance and parts availability

Customer Value Proposition

- Built for industrial-scale sanding
- Saves time and labor with fast material removal
- Long service life = strong return on investment
- Made in the USA quality assurance

Take the Next Step

Equip your shop with the Kalamazoo S8HD and take on the toughest sanding jobs with confidence.
