

S272V – A Clean, Powerful Upgrade for Blacksmithing and Fabrication Shops

For today's blacksmiths and fabrication shops, efficiency, cleanliness, and reliability are critical. The Kalamazoo Industries S272V 2" x 72" Industrial Belt Grinder with Vacuum Base combines a rugged belt grinder and integrated vacuum to shape, finish, and refine material while sharply reducing airborne dust. From structural steel and forged components to ornamental iron and custom toolmaking, it delivers the power and stability needed for daily industrial use.

Key Advantages for Your Shop

Integrated Grinder and Vacuum System: Improves visibility, reduces cleanup time, and helps maintain a healthier workspace.

- **Industrial Belt Drive Power:** Provides consistent torque for heavy grinding, shaping, and finishing applications.
- **Versatile Material Performance:** Ideal for smoothing forged steel, detailing ornamental iron, prepping structural steel, and crafting precise custom tools.
- **Heavy-Duty Construction:** Built for long service life in demanding environments, from fabrication floors to blacksmith shops.

- **Modular Design:** Easily adjust and configure for a range of grinding setups without sacrificing stability or speed.

The S272V is more than a grinder—it's a productivity tool that supports cleaner work, faster turnaround, and better surface results across your most common metalworking tasks.

If your shop is considering new grinding equipment for the coming year, now is an excellent time to invest in a machine designed to deliver consistent performance and reduced downtime.
