

KALAMAZOO **INDUSTRIES, INC.**

S460W Wet Abrasive Finishing Sander **Industrial Power Meets Precision Finishing**

The Kalamazoo S460W 4" x 60" Wet Abrasive Finishing Sander is engineered for professionals who demand power, precision, and durability. Perfect for metalworking, polishing, and deburring, this industrial-grade sander delivers consistent results with every pass.

Key Features

- 3HP motor is available in 1PH 220V (only) or 3PH 220V and 440v configurations.
- Heavy-duty steel construction with cast iron frame for long-lasting durability.
- Built-in flood coolant system with a 10-gallon steel tank helps prevent overheating and prepares material surfaces for inspection.
- This version improves readability and maintains a professional tone. Would you like help updating this in your flyer or need more copy edits?
- Adjustable 5" x 8" cast iron worktable with mitre gauge slot for precision work.
- Quick-change belt system with preset spring tension and one-lever operation.
- Magnetic controls with 24V on/off switch for safe operation.
- Reversible and replaceable 4" x 17" steel platen for extended use.
- Flexible coolant nozzle with flow control for targeted cooling.

Applications

Ideal for fabrication shops, metalworking facilities, and manufacturing plants. Use the S460W for beveling, deburring, squaring ends, rounding corners, flatwork, contouring, and polishing a variety of materials including steel, aluminum, brass, bronze, and glass.
