

Precision Meets Clean Performance

The Kalamazoo S612V combines a powerful 6" x 48" belt sander and 12" disc sander into one industrial-grade workstation, now with an integrated vacuum base for dust collection. Built for metalworkers, fabricators, and maintenance departments that need speed, precision, and cleanliness in a single, compact footprint.

100 CFM
INTEGRATED
DUST EXTRACTOR

Key Features:

- **2-in-1 Functionality:** 6" x 48" belt sander + 12" disc sander.
- **Integrated Vacuum System:** Built-in dust extractor keeps your workspace clean and safe.
- **Versatile Belt Positioning:** Operates vertically or horizontally for custom sanding angles.
- **Quick Belt Change:** One-lever release system reduces downtime.
- **Heavy-Duty Build:** Cast iron tables and a steel base for long-term durability.
- **Motor Options:** 3 HP 1PH and or 3PH configurations available.
- **Made in the USA:** Reliable, rugged craftsmanship for industrial environments.

Benefits:

- **Efficiency boost:** Two sanding tools in one – switch between belt and disc without juggling machines.
- **Cleaner environment:** Built-in extractor reduces airborne dust to improve shop safety and cleanliness.
- **Versatility:** Handles metal, wood, plastics – deburring, beveling, edge finishing, flat-stock prep.
- **Space saver:** One footprint replaces separate belt and disc units.
- **Reduced downtime:** Quick belt changes, rugged build means less maintenance and better uptime.

APPLICATIONS HIGHLIGHT

- Deburring welds, flattening stock, edge rounding in machine/fabrication shops.
- Smoothing aluminum castings, wood stocks, composite panels.
- Maintenance departments needing one reliable sander for mixed materials.
- Ideal for metal, wood, plastics and composites.

SPECIFICATIONS

- **Belt size:** 6" × 48"
- **Speed:** 2,800 SFPM. **Disc size:** 12" diameter, Speed 2,500 SFPM.
- **Built-in dust extractor:** 100 CFM capacity.
- **Shipping weight:** 425 lb (approx.).

WHY CHOOSE THIS MODEL?

- For shops that refuse to compromise: this isn't a light bench sander—it's built for production environments.
- For those who want cleaner air in the workspace — the dust extractor adds real value.
- For multi-material or mixed-use environments – metal fabrication, woodworking, maintenance, prototypes.
- For maximizing value and space: get both belt and disc in one machine.
