

KALAMAZOO **INDUSTRIES, INC.**

Kalamazoo S6MW 6" x 48" Wet Belt Sander

Built for Precision. Designed for Durability.

Take your finishing work to the next level with the Kalamazoo S6MW — a powerful metal polishing machine built for wet polishing and fine surface preparation. Perfect for metallography sample prep, this heavy-duty tool is a must-have in any professional metallography equipment setup. With its robust motor, cooling system, and easy belt changes, the S6MW is also the ideal metallographic polishing machine for both research labs and busy production floors.

Why Choose the S6MW?

When precision and consistency matter, the S6MW delivers. Its cooling system prevents heat damage during wet polishing, ensuring your work stays accurate and professional. As a trusted metal polishing machine, it provides the performance and durability you need for demanding metallography work. This metallographic polishing machine is designed to integrate seamlessly into existing metallography equipment setups, making it an investment that pays off for years.

Key Features:

- 6" x 48" belt for versatile finishing
- 3 HP motor (1 PH or 3 PH)
- 10-gallon coolant tank with pump for continuous wet polishing
- Adjustable cast iron worktable
- Quick lever belt change with spring tension
- Steel platen for accurate flat sanding
- Heavy-duty cast iron stand
- Made in the USA

Perfect For:

- Metallography sample preparation in labs
- Precision finishing in metallography equipment setups
- Final surface refinement with a metal polishing machine
- Research and production use of a metallographic polishing machine
- Reliable wet polishing for metal, plastic, and composite parts

The Bottom Line

The S6MW delivers consistent wet polishing for metallography, metallography equipment, and is a rugged metal polishing machine and precise metallographic polishing machine.
